Web Site	http://www.hud.gov
GIS Platforms	Maptitude
Operating Platforms	Windows 95/98/NT

·Fully functional GIS software containing a built-in database of geographic, census demographic, and HUD program data for the entire United States.
·The "Map Library" allows users to access data easily and create over one hundred maps with no more than three mouse clicks.
·The "Query Builder" allows users to retrieve and display information describing HUD activities within a user-defined area.

Product Name	***Community Policing Beat Book***
Manufacturer	ESRI, Inc. and National Institute of Justice (NIJ)
Area	Crime Mapping/Analysis
Contact	ESRI, Inc.
Address	380 New York Street Redlands, CA 92373-8100
Phone	800-447-9778
Fax	909-793-5953
Email Address	info@esri.com
Web Site	http://www.ojp.usdoj.gov/cmrc
GIS Platforms	ArcExplorer
Operating Platforms	Windows 95/98/NT or UNIX

- A free application developed by NIJ and ESRI that gives officers access to electronic maps that display information about the community, tools for recording and mapping various types of information, as well as simple search and query functionality.
- The application can be personalized by the officer, and is designed for use either in the field on a laptop or in-car computer, or at the station.

CrimeNtel includes security and access control screening with dissemination log and purge/review capabilities. CrimeNtel uses icons and "tree views" to show linked elements at a glance. This software also allows "Fast Find" and "Query Builders" to search one data field or a combination of data fields. The imaging feature links users to a limitless number of images. CrimeNtel also supports linking to existing image fiels on a network, hard drive, floppy drive, or other media.

Product Name	***CrimeShow***
Manufacturer	Developed for the Boston, MA Police Department
Area	Crime Mapping/Analysis
Contact	Don McGough, Director of Research & Ev
Address	One Schroeder Plaza Boston, MA 02120
Phone	617-343-4530
Fax	
Email Address	mcgoughd.bpd@ci.boston.ma.us
Web Site	http://www.ci.boston.ma.us/police
GIS Platforms	ArcView
Operating Platforms	Windows 95/98/NT

·CrimeShow has been in use for approximately six months and was developed using ESRI's MapObjects software.
·CrimeShow includes basic mapping and charting functionality, as well as links to on-line incident reports, booking sheets, mug shots, and 360 degree interactive photographs, all of which are activated by selecting points on a map.
·Charts and maps are interactive and can be displayed simultaneously. For instance, while displaying a robbery map, you can show a pie chart of those incidents by weaon type.
·Crime analysts are currently the primary users of the CrimeShow application; however, additional police personnel may have access to the program in the future.

Product Name	***CRIMESolv***
Manufacturer	ArcBridge Consulting and Training, Inc.
Area	Crime Mapping/Crime Analysis
Contact	
Address	203 Elden St., Suite 303 Herndon, VA 20170
Phone	703-834-6511
Fax	703-834-6514
Email Address	info@CRIMESolv.com
Web Site	www.crimesolv.com
GIS Platforms	Stand alone
Operating Platforms	Windows

CRIMESolv is a geographic information system specifically tailored for crime analysis and crime mapping. The software interfaces with existing Computer Aided Dispatch (CAD) and Records Management Systems (RMS) databases to automatically import data at scheduled intervals, providing departments with the most recent data and reports to analyze.
The system empowers allocation of scarce staffing and predicts crime patterns. The technology can help the department schedule times and areas for patrols and provide shifts with information for ongoing investigations. It may also be used to provide the patrol force a better idea of when and where accidents are occurring.

Product Name	*CrimeStat*

Operating Platforms	Windows 95/98/00/NT

·CrimeStat is a free spatial statistics program for the analysis of crime incident locations, developed by Ned Levine & Associates under grants from the Crime Mapping Research Center at NIJ.
·Provides supplemental statistical tools to aid law enforcement agencies and criminal justice researchers in their crime mapping efforts.
·The program inputs incident locations in dBase© 'dbf,' 'shp,' or ASCII format, calculates various spatial statistics and writes graphical objects to ArcView®, MapInfo®, Atlas*GIS™, Surfer® for Windows, and ArcView Spatial Analyst© as well as to other GIS packages, such as Maptitude® and Vertical Mapper®.

Operating Platforms
Windows
CrimeStat 2 is a stand-alone spatial statistics program for the analysis of crime incident locations that can interface with most desktop GIS programs. The purpose is to provide supplemental statistical tools to aid law enforcement agencies and criminal justice researchers in their crime mapping efforts. Thus, the underlying philosophy behind CrimeStat is to provide an extension to GIS-based software for the purpose of helping researchers and analysts in their work.
The program inputs incident locations in '.dbf', '.shp', '.dat', or ASCII formats using either spherical or projected coordinates. Also, it can treat zones as pseudo-points (or points with intensities). The program calculates various spatial statistics and writes graphical objects as map features to ArcView ®, ArcGIS ®,, MapInfo ®,, Atlas*GIS TM, Surfer ®, for Windows, ArcView Spatial Analyst ©.

Product Name	***Crime View***
Manufacturer	The Omega Group
Area	Crime Mapping/Analysis
Contact	Milan Mueller, President
Address	12707 High Bluff Drive, Suite 120 San Diego, CA 92130-2035

GIS Platforms	
Operating Platforms	Windows 98/2000/NT

This product is a data mining tool that has a modular design consisting of an associative analysis engine, a graphical user interface and interfaces to virtually all common database formats. Several tasks are supported (e.g., normal queries, profile analysis, extensive graphical report facilities, etc.). The scoring tool, Targas, covers prediction of unknown information such as the possibility of response of a certain customer on some mail action. A module in DataDetective is Looking Glass. It helps the user visualize and analyze the different subgroups in a database.
